

Steelcase GRBC 3 Conference Room

Date : 05/10/2018

The Cove Conference Room at the Steelcase Business Center in Grand Rapids, Michigan is a center for large-scale meetings and idea-sharing. It is with this understanding that the design team incorporated collaborative products to support the function of the space. A custom vertical installation featuring three a³ CeramicSteel Sans boards positioned side-by-side with Surface Imaging of an artistic swath of paint printed across the bottom, the first product serves as a visual focal point in the space as much as a functional writing surface.

The second installation features two large [a³ CeramicSteel Sans boards](#) in a grey chalk finish, flanking a monitor. Available for the presenter to take notes or supplement presentations with visual highlights, the a³ CeramicSteel Sans boards complement the color scheme of the conference room while serving as a useful space for collaboration.
